Precipitation probability					
20%	20%	60%	60%	30%	10%

Forecast for Sunday 28 Nov 2021

Weather: A cold start with a widespread frost, but otherwise generally dry and bright through the morning, with just the low risk of a shower in the far west of the range. Clouding over into the afternoon with outbreaks of rain, sleet and some snow likely. Snow mostly above around 400m, where some small accumulations are likely. Becoming increasingly dry and clear during the evening with clear spells developing overnight and temperatures falling once again.

Chance of cloud free mountain/hill tops above 800m: 80% in the morning, falling to 20% by the afternoon.

Visibility: Generally very good through much of the day. Falling to poor in outbreaks of sleet and snow into the afternoon, and locally very poor over the peaks at times as increasingly broken cloud lowers to around 400-600m in places during the afternoon and evening.

Meteorologist's View

A very cold day, especially in strong winds early morning. Note temperatures in sheltered valleys likely to be colder than in table early morning, locally minus 1 or 2 Celsius.

Forecast for Monday 29 Nov 2021

Weather: Cold and dry with high cloud increasing towards dawn. Then a mainly dry but overcast morning with cloud gradually thickening. Lower cloud and outbreaks of generally light rain, drizzle and briefly snow spreading into the area through the afternoon and evening with freshening winds.

Maximum wind: North becoming West or Southwest 5-10 mph. Increasing 15-20 gusting 30 mph in the evening.

Chance of cloud free mountain/hill tops above 800m: 90% through the morning. Reducing to 30% through the afternoon.

Visibility: Generally very good to start. Falling to moderate or poor in light rain, drizzle or any temporary outbreaks of sleet and snow into the afternoon, and locally very poor over the peaks at times as cloud lowers to around 400m in places by the evening.

Temperature: **Valleys:** Zero Celsius rising to plus 5 Celsius in the afternoon, then plus 7 Celsius late evening.
At 800m: Minus 1 Celsius rising to plus 2 Celsius during the afternoon, plus 5 Celsius late evening.
Freezing level: 300-400m rising to 1000m by midday then above the summits by late afternoon.
